

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A gaming device comprising:

at least one display device;
at least one input device;
at least one processor; and
at least one memory device which stores a plurality of instructions which, when executed by the at least one processor, cause the at least one processor to operate with the at least one display device and the at least one input device to:

(a) display an award indicator including a plurality of first award symbols and a plurality of second award symbols; ~~a plurality of first awards associated with said first award symbols;~~ and a plurality of second awards associated with said second award symbols; wherein

(i) a plurality of first activatable symbol indicators are associated with the first award symbols;

(ii) a plurality of second activatable symbol indicators are associated with the second award symbols, and

(iii) ~~wherein the first and second symbol indicators are movable relative to the award indicator;~~ and,

~~a processor configured to~~

(b) enable a player to pick one of the first symbol indicators to activate said picked first symbol indicator,

(c) enable the player to pick one of the second symbol indicators to activate said picked second symbol indicator,

(d) cause said activated first symbol indicator to indicate one of the first award symbols on the award indicator,

(e) cause said activated second symbol indicator to indicate one of the second award symbols on the award indicator, and

(f) provide a total award to a player based on the first and second awards associated with the indicated first and second award symbols.

Claim 2 (original): The gaming device of Claim 1, wherein the first award symbols and the second award symbols are related.

Claim 3 (previously presented): The gaming device of Claim 2, wherein the first award symbols and the second award symbols are related by their positions on the award indicator.

Claim 4 (original): The gaming device of Claim 2, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is approximately the same.

Claim 5 (original): The gaming device of Claim 2, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is different in each indication of the first and second award symbols.

Claim 6 (original): The gaming device of Claim 2, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is different in a plurality of the indications of the first and second award symbols.

Claim 7 (original): The gaming device of Claim 1, wherein at least one of the first awards and the second awards are the same.

Claim 8 (original): The gaming device of Claim 1, wherein a plurality of the first awards and the second awards are the same.

Claim 9 (original): The gaming device of Claim 1, wherein all of the first awards and the second awards are different.

Claim 10 (original): The gaming device of Claim 1, wherein at least one of the first and second awards includes a modifier.

Claim 11 (original): The gaming device of Claim 10, wherein the modifier includes a multiplier.

Claim 12 (previously presented): The gaming device of Claim 1, wherein the total award is a sum of the first and second awards associated with the indicated first and second award symbols.

Claim 13 (previously presented): The gaming device of Claim 1, wherein the total award is a product of the first and second awards associated with the indicated first and second award symbols.

Claim 14 (canceled).

Claim 15 (currently amended): The gaming device of Claim ~~14~~ 1, wherein the at least one display device includes a touch screen.

Claim 16 (currently amended): The gaming device of Claim ~~1~~ 15, ~~which includes a touch screen in communication with the processor, wherein the plurality of instructions, when executed by the at least one processor, cause the at least one processor to~~

~~enables~~ enable a player to utilize the touch screen select one of the first symbol indicators and one of the second symbol indicators.

Claims 17 to 18 (canceled).

Claim 19 (original): The gaming device of Claim 1, wherein the first award symbols and the second award symbols include at least one bonus symbol.

Claim 20 (original): The gaming device of Claim 19, wherein at least one free activation of the award indicator is associated with the bonus symbol.

Claim 21 (original): The gaming device of Claim 1, which includes a selection display having a plurality of player selectable first inputs and a plurality of player selectable second inputs, wherein the first inputs correspond to the first symbol indicators and the second inputs correspond to the second symbol indicators.

Claim 22 (previously presented): The gaming device of Claim 1, wherein at least two of the symbol indicators associated with the first award symbols have a same average expected value.

Claim 23 (previously presented): The gaming device of Claim 22, wherein at least two of the symbol indicators associated with the second award symbols have a same average expected value.

Claim 24 (previously presented): The gaming device of Claim 1, wherein all of the symbol indicators associated with the first award symbols have a same average expected value.

Claim 25 (previously presented): The gaming device of Claim 24, wherein all of the symbol indicators associated with the second award symbols have a same average expected value.

Claim 26 (original): The gaming device of Claim 1, wherein each first award has a probability of being associated with each first symbol indicator.

Claim 27 (original): The gaming device of Claim 1, wherein each second award has a probability of being associated with each second symbol indicator.

Claim 28 (currently amended): A gaming device comprising:

at least one display device;

at least one input device;

at least one processor; and

at least one memory device which stores a plurality of instructions which, when executed by the at least one processor, cause the at least one processor to operate with the at least one display device and the at least one input device to:

(a) display a plurality of award indicators including a plurality of first award symbols and a plurality of second award symbols; said first award symbols associated with a plurality of first awards and said second award symbols associated with a plurality of second awards, wherein:

(i) a plurality of first activatable symbol indicators are positioned adjacent to the first award symbols of said award indicators;

(ii) a plurality of second activatable symbol indicators are positioned adjacent to the second award symbols of said award indicators, ~~wherein and~~

(iii) the first and second symbol indicators are movable relative to the award indicator;

~~a plurality of first awards associated with said first award symbols;~~

~~a plurality of second awards associated with said second award symbols; and~~

~~a processor configured to:~~

~~(a)~~(b) enable a player to select at least one of the first symbol indicators to activate said picked first symbol indicator,

~~(b)~~(c) enable the player to select at least one of the second symbol indicators to activate said picked second symbol indicator,

~~(e)~~(d) cause any activated first symbol indicators to indicate the first award symbols,

~~(d)~~(e) cause any activated second symbol indicators to indicate the second award symbols, and

~~(e)~~(f) provide a total award to a player based on the first and second awards associated with the indicated first and second award symbols.

Claim 29 (original): The gaming device of Claim 28, wherein at least one of the first awards and the second awards are the same.

Claim 30 (original): The gaming device of Claim 28, wherein a plurality of the first awards and the second awards are the same.

Claim 31 (original): The gaming device of Claim 28, wherein all of the first awards and the second awards are different.

Claim 32 (original): The gaming device of Claim 28, wherein at least one of the first and second awards includes a modifier.

Claim 33 (original): The gaming device of Claim 28, wherein the modifier includes a multiplier.

Claim 34 (previously presented): The gaming device of Claim 28, wherein the total award is a sum of the first and second awards associated with the indicated first and second award symbols.

Claim 35 (previously presented): The gaming device of Claim 28, wherein the total award is a product of the indicated first and second awards associated with the indicated first and second award symbols.

Claim 36 (canceled).

Claim 37 (currently amended): The gaming device of Claim 36~~28~~, which includes a touch screen ~~operable~~ configured to operate with the at least one display device.

Claim 38 (currently amended): The gaming device of Claim 28, which includes a touch screen ~~in communication with the processor~~, wherein the plurality of instructions, when executed by the at least one processor, cause the at least one processor to enable ~~enables~~ a player to utilize the touch screen to select one of the first symbol indicators and one of the second symbol indicators associated with at least one of the award indicators.

Claim 39 (previously presented): The gaming device of Claim 28, which includes a touch screen ~~in communication with the processor~~, wherein the plurality of instructions, when executed by the at least one processor, cause the at least one processor enables ~~enables~~ a player to utilize the touch screen to select one of the award indicators.

Claim 40 (original): The gaming device of Claim 28, wherein the first award symbols or the second award symbols include at least one bonus symbol.

Claim 41 (original): The gaming device of Claim 28, wherein at least one free activation of the award indicator is associated with the bonus symbol.

Claim 42 (canceled).

Claim 43 (original): The gaming device of Claim 28, wherein the first and second award symbols are positionally related.

Claim 44 (original): The gaming device of Claim 43, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award

symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is approximately the same.

Claim 45 (original): The gaming device of Claim 43, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is different in each indication of the first and second award symbols.

Claim 46 (original): The gaming device of Claim 43, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is different in a plurality of the indications of the first and second award symbols.

Claim 47 (currently amended): A gaming device comprising:

at least one display device;

at least one input device;

at least one processor; and

at least one memory device which stores a plurality of instructions which, when executed by the at least one processor, cause the at least one processor to operate with the at least one display device and the at least one input device to:

(a) display an award indicator including a plurality of first award symbols and a plurality of second award symbols; wherein:

(i) a plurality of first awards are associated with said first award symbols;

(ii) a plurality of second awards are associated with said second award symbols;

(iii) a plurality of first activatable symbol indicators are positioned adjacent to the first award symbols;

(iv) a plurality of second activatable symbol indicators are positioned adjacent to the second award symbols, wherein and

(v) the first and second symbol indicators are movable relative to the award indicator; and
~~a processor configured to~~

(b) enable a player to pick at least one of the first symbol indicators to activate said picked first symbol indicators,

(c) enable a the player to pick at least one of the second symbol indicators to activate said picked second symbol indicators,

(d) cause said activated first symbol indicators to indicate a plurality of the first award symbols on the award indicator,

(e) cause said activated second symbol indicators to indicate a plurality of the second award symbols on the award indicator, and

(f) provide a total award to the player based on the first and second awards associated with the indicated first and second award symbols on the award indicator.

Claim 48 (original): The gaming device of Claim 47, wherein at least one of the first and second awards includes a modifier.

Claim 49 (original): The gaming device of Claim 48, wherein the modifier includes a multiplier.

Claim 50 (previously presented): The gaming device of Claim 47, wherein the total award is a sum of the first and second awards associated with the indicated first and second award symbols.

Claim 51 (previously presented): The gaming device of Claim 47, wherein the total award is a product of the indicated first and second awards associated with the indicated first and second award symbols.

Claim 52 (currently amended): The gaming device of Claim 47, ~~which includes wherein the plurality of instructions, when executed by the at least one processor, cause the at least one processor to operate with the at least one display device to display a~~ plurality of award indicators including a plurality of first award symbols and a plurality of second award symbols.

Claim 53 (original): The gaming device of Claim 47, wherein the first and second award symbols are related.

Claim 54 (original): The gaming device of Claim 53, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is approximately the same.

Claim 55 (original): The gaming device of Claim 53, which includes an average expected award based on the first and second awards associated with at least one of

the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is different in each indication of the first and second award symbols.

Claim 56 (original): The gaming device of Claim 53, which includes an average expected award based on the first and second awards associated with at least one of the indicated first award symbols and at least one of the indicated second award symbols, wherein the first and second awards are arranged on the award indicator so that the average expected award is different in a plurality of the indications of the first and second award symbols.

Claim 57 (currently amended): A method of operating a gaming device, said method comprising:

(a) ~~displaying~~ causing at least one display device to display an award indicator including a plurality of first award symbols and a plurality of second award symbols to a player, wherein a plurality of first awards are associated with the first award symbols and a plurality of second awards are associated with the second award symbols;

(b) enabling the player to utilize at least one input device to pick one of a plurality of first symbol indicators positioned adjacent to the first award symbols;

(c) enabling the player to utilize the at least one input device to pick one of a plurality of second symbol indicators positioned adjacent to the second award symbols;

(d) activating the picked first and second symbol indicators;

(e) moving said activated first and second symbol indicators while the award indicator remains stationary;

(f) ~~indicating~~ causing at least one display device to display an indication of one of the first award symbols with the activated first symbol indicator;

(g) ~~indicating~~ causing at least one display device to display an indication of one of the second award symbols with the activated second symbol indicator; and

(h) providing a total award to the player based on the first and second awards associated with the indicated first and second award symbols on the award indicator.

Claim 58 (original): The method of Claim 57, wherein providing the total award to the player includes summing the indicated first and second awards associated with the indicated first and second award symbols.

Claim 59 (original): The method of Claim 57, wherein providing the total award to the player includes multiplying the indicated first and second awards associated with the indicated first and second award symbols.

Claim 60 (canceled).

Claim 61 (currently amended): The method of Claim ~~60~~ 57, wherein the at least one display device includes a touch screen.

Claim 62 (canceled).

Claim 63 (canceled).

Claim 64 (original): The method of Claim 57, which includes providing the player with at least one free activation of the award indicator when at least one bonus symbol is associated with the first award symbol or second award symbol indicated by the activated first and second symbol indicators.

Claim 65 (original): The method of Claim 57, which includes enabling the player to pick at least one first input and at least one second input on a selection display, wherein the first inputs correspond to the first symbol indicators and the second inputs correspond to the second symbol indicators on the award indicator.

Claim 66 (currently amended): The method of Claim 57, wherein ~~displaying~~ causing the at least one display device to display the award indicator includes causing the at least one display device to display ~~displaying~~ a plurality of award indicators including a plurality of first award symbols positionally adjacent to a plurality of second award symbols.

Claim 67 (currently amended): The method of Claim 57, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicators so that an average expected total award is the same every time at least one first award and at least one second award are provided to the player.

Claim 68 (currently amended): The method of Claim 57, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is different every time at least one first award and at least one second award are provided to the player.

Claim 69 (currently amended): The method of Claim 57, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is different in a plurality of times at least one first award and at least one second award are provided to the player.

Claim 70 (previously presented): The method of Claim 57, wherein (a) to (h) are provided to the player through a data network.

Claim 71 (original): The method of Claim 70, wherein the data network is an internet.

Claim 72 (currently amended): A method of operating a gaming device, said method comprising:

(a) ~~displaying~~ causing at least one display device to display an award indicator including a plurality of first award symbols and a plurality of second award symbols to a player, wherein a plurality of first awards are associated with the first award symbols and a plurality of second awards are associated with the second award symbols;

(b) enabling the player to utilize at least one input device to pick a plurality of first symbol indicators positioned adjacent to the first award symbols;

(c) enabling the player to utilize the at least one input device to pick a plurality of second symbol indicators positioned adjacent to the second award symbols;

(d) activating the picked first and second symbol indicators;

(e) moving said activated first and second symbol indicators relative to the award indicator;

(f) ~~indicating~~ causing the at least one display device to display an indication of the first award symbols with the activated first symbol indicators;

(g) ~~indicating~~ causing the at least one display device to display an indication of the second award symbols with the activated second symbol indicators; and

(h) providing a total award to the player based on the first and second awards associated with the indicated first and second award symbols on the award indicator.

Claim 73 (original): The method of Claim 72, wherein providing the total award to the player includes summing the indicated first and second awards associated with the indicated first and second award symbols.

Claim 74 (original): The method of Claim 72, wherein providing the total award to the player includes multiplying the indicated first and second awards associated with the indicated first and second award symbols.

Claim 75 (currently amended): The method of Claim 72, which includes enabling the player to utilize the at least one input device to select a plurality of the activatable first

symbol indicators and a plurality of the activatable second symbol indicators using a touch screen.

Claim 76 (original): The method of Claim 72, which includes providing the player with at least one free activation of the award indicator when at least one bonus symbol is associated with the first award symbol or second award symbol indicated by the activated first and second symbol indicators.

Claim 77 (canceled).

Claim 78 (currently amended): The method of Claim 72, wherein ~~displaying~~ causing the at least one display device to display the award indicator includes ~~displaying~~ causing the at least one display device to display a plurality of award indicators including a plurality of first award symbols and a plurality of second award symbols.

Claim 79 (currently amended): The method of Claim 72, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is the same every time at least one first award and at least one second award are provided to the player.

Claim 80 (currently amended): The method of Claim 72, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is different every time at least one first award and at least one second award are provided to the player.

Claim 81 (currently amended): The method of Claim 72, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is different in a plurality of times at least one first award and at least one second award are provided to the player.

Claim 82 (previously presented): The method of Claim 72, wherein (a) to (h) are provided to the player through a data network.

Claim 83 (original): The method of Claim 82, wherein the data network is an internet.

Claim 84 (currently amended): A method of operating a gaming device, said method comprising:

(a) ~~displaying~~ causing at least one display device to display a plurality of award indicators to a player, each award indicator including a plurality of first award symbols and a plurality of second award symbols, wherein a plurality of first awards are associated with the first award symbols and a plurality of second awards are associated with the second award symbols;

(b) enabling the player to utilize at least one input device to pick one of a plurality of first symbol indicators positioned adjacent to the first award symbols on at least one of the award indicators;

(c) enabling the player to utilize the at least one input device to pick one of a plurality of second symbol indicators positioned adjacent to the second award symbols on at least one of the award indicators;

(d) activating the picked first and second symbol indicators;

(e) moving said activated first and second symbol indicators relative to the award indicator;

(f) causing the at least one display device to display indicating an indication of the first award symbols with the activated first symbol indicators;

(g) causing the at least one display device to display indicating an indication of the second award symbols with the activated second symbol indicators; and

(h) providing a total award to the player based on the first and second awards associated with the indicated first and second award symbols on the award indicator.

Claim 85 (original): The method of Claim 84, wherein providing the total award to the player includes summing the indicated first and second awards associated with the indicated first and second award symbols on the award indicators.

Claim 86 (original): The method of Claim 84, wherein providing the total award to the player includes multiplying the indicated first and second awards associated with the indicated first and second award symbols on the award indicators.

Claim 87 (currently amended): The method of Claim 84, which includes enabling the player to utilize the at least one input device to select one of the activatable first symbol indicators and one of the activatable second symbol indicators on at least one of the award indicators using a selector.

Claim 88 (currently amended): The method of Claim 84, which includes enabling the player to utilize the at least one input device to select at least one of the award indicators using a touch screen.

Claim 89 (currently amended): The method of Claim 84, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is the same every time at least one first award and at least one second award are provided to the player.

Claim 90 (currently amended): The method of Claim 84, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is different every time at least one first award and at least one second award are provided to the player.

Claim 91 (currently amended): The method of Claim 84, which includes ~~displaying~~ causing the at least one display device to display the first and second awards on the award indicator so that an average expected total award is different in a plurality of times at least one first award and at least one second award are provided to the player.

Claim 92 (previously presented): The method of Claim 84, wherein (a) to (h) are provided to the player through a data network.

Claim 93 (original): The method of Claim 92, wherein the data network is an internet.

Claims 94 to 102 (canceled).

Claim 103 (currently amended): A gaming device comprising:

at least one display device;

at least one input device;

at least one processor; and

at least one memory device which stores a plurality of instructions which, when executed by the at least one processor, cause the at least one processor to operate with the at least one display device and the at least one input device to:

(a) display a plurality of award indicators including a plurality of first award symbols and a plurality of second award symbols; wherein a plurality of first awards are associated with said first award symbols for at least one of said award indicators and a plurality of second awards associated with said second award symbols for at least one of said award indicators, and wherein:

(i) a plurality of first activatable symbol indicators are positioned adjacent to the first award symbols of each of said award indicators;

(ii) a plurality of second activatable symbol indicators are positioned adjacent to the second award symbols of each of said award indicators, and

(iii) ~~wherein the first and second activatable symbol indicators are movable relative to the award indicator;~~

~~a plurality of first awards associated with said first award symbols for at least one of said award indicators;~~

~~a plurality of second awards associated with said second award symbols for at least one of said award indicators; and~~

~~a processor configured to:~~

~~(a)~~(b) enable a player to pick at least one of the first symbol indicators associated with at least one of said award indicators to activate said picked first symbol indicator,

~~(b)~~(c) enable the player to pick at least one of the second symbol indicators associated with at least one of said award indicators to activate said picked second symbol indicator,

~~(e)~~(d) cause any activated first symbol indicators to indicate the first award symbols,

~~(d)~~(e) cause any activated second symbol indicators to indicate the second award symbols, and

~~(e)~~(f) provide a total award to a player, wherein said total award is the product of the indicated first and second awards associated with the indicated first and second award symbols.

Claim 104 to 116 (cancelled).

Claim 117 (currently amended): A method of operating a gaming device, said method comprising:

- (a) ~~displaying~~ causing at least one display device to display an award indicator including a plurality of first award symbols and a plurality of second award symbols to a player, wherein a plurality of first awards are associated with the first award symbols and a plurality of second awards are associated with the second award symbols;
- (b) enabling the player to utilize at least one input device to pick a plurality of first symbol indicators positioned adjacent to the first award symbols;
- (c) enabling the player to utilize the at least one input device to pick a plurality of second symbol indicators positioned adjacent to the second award symbols;
- (d) activating the picked first and second symbol indicators;
- (e) moving the activated first and second symbol indicators relative to the award indicator;
- (f) ~~indicating~~ causing the at least one display device to display an indication of the first award symbols with the activated first symbol indicators;
- (g) ~~indicating~~ causing the at least one display device to display an indication of the second award symbols with the activated second symbol indicators; and
- (h) providing a total award to the player which includes multiplying the indicated first and second awards associated with the indicated first and second award symbols.

Claim 118 to 120 (cancelled).

Claim 121 (currently amended): A method of operating a gaming device, said method comprising:

(a) ~~displaying~~ causing at least one display device to display a plurality of award indicators to a player, each award indicator including a plurality of first award symbols and a plurality of second award symbols, wherein a plurality of first awards are associated with the first award symbols and a plurality of second awards are associated with the second award symbols;

(b) enabling the player to utilize at least one input device to pick at least one of a plurality of first symbol indicators positioned adjacent to the first award symbols on at least one of the award indicators;

(c) enabling the player to utilize the at least one input device to pick at least one of a plurality of second symbol indicators positioned adjacent to the second award symbols on at least one of the award indicators;

(d) activating the picked first and second symbol indicators;

(e) moving the activated first and second symbol indicators relative to the award indicator;

(f) ~~indicating~~ causing the at least one display device to display an indication of the first award symbols with the activated first symbol indicators;

(g) ~~indicating~~ causing the at least one display device to display an indication of the second award symbols with the activated second symbol indicators; and

(h) providing a total award to the player which includes multiplying the indicated first and second awards associated with the indicated first and second symbols on the award indicators.

Claim 122 to 124 (cancelled).

Claim 125 (original): The gaming device of Claim 28, which includes a selection display having a plurality of player selectable first inputs and a plurality of player selectable second inputs, wherein the first inputs correspond to the first symbol indicators and the second inputs correspond to the second symbol indicators.

Claim 126 (original): The method of Claim 72, which includes enabling the player to pick at least one first input and at least one second input on a selection display, wherein the first inputs correspond to the first symbol indicators and the second inputs correspond to the second symbol indicators on the award indicator.
